

# LET YOUR VOICE BE HEARD!

**PARTICIPATE IN THE NATIONAL DAY OF ACTION**

**AS PART OF THE RALLY FOR MEDICAL RESEARCH**

**SEPTEMBER 14, 2017**

Federal funding for medical research is critical to the health and well-being of our citizens and for the economic security and global leadership of the United States. In fiscal years 2016 and 2017, Congress provided the first significant increases in funding for the National Institutes of Health (NIH) in more than a decade. Now is the time to build on that momentum by urging Congress to continue making medical research a national priority by providing robust, sustained, and predictable funding increases for the NIH in 2018 and beyond.

Join a broad coalition of stakeholders representing millions of patients and other advocates from the medical research advocacy community on September 14, 2017, for the next Rally for Medical Research National Day of Action and help raise awareness of the urgent need for continued investment in the NIH to improve health, spur more progress, inspire more hope, and save more lives.

**MAKE PLANS TODAY** to join us online on September 14 when researchers, clinicians, survivors and other advocates will convene on Capitol Hill to speak with one voice about the importance of funding for the NIH!
